CREDENTIAL

Certified Master Builder

Brad Barrington makes monumental sculpture in cast bronze and aluminum for civic, corporate, and private sites. Four decades as a Certified Master Builder stand behind every commission — a proposed work is treated as a deliverable project: engineered, permitted, installed, and maintained, not only an artwork.

## DELIVERY COMPETENCIES

- Engineered foundations
- Permitting & plan review
- ADA compliance
- Stormwater / SWPPP
- Crane & rigging
- Installation sequencing
- Insurance & bonding
- Maintenance & closeout

## MATERIALS & PROCESS

01 **Clay original**

02 **3D scan**

03 **Digital enlargement**

04 **Cast bronze / aluminum**

05 **Patina**

06 **Exterior clear coat**

Selected works are published as **interactive 3D models**, so a committee can examine a proposal in the round — scale, form, and surface — before anything is fabricated.

## DELIVERY CAPABILITY

Every commission is backed by Brad's building and development practice — the discipline that carries a large permanent object from award to a safe, lasting installation in a public setting.

**Building since 1985; developing in the DFW Metroplex since 1997.** Direct experience with municipal plan review, structural and geotechnical engineering, ADA, SWPPP, procurement, inspection, bonding, and closeout.

### DIFFERENTIATORS

- **Fifty years** of continuous studio practice; work held in public, corporate, and private collections.
- **Monumental cast bronze & aluminum** — clay originals enlarged and cast for permanent outdoor life.
- **Interactive 3D models** let a selection committee examine a proposed work in the round before fabrication.
- **Certified Master Builder** — in-house delivery of foundations, permitting, installation and maintenance.
- **Dallas–Fort Worth based**; four decades delivering built projects from $200,000 to $3,000,000.

Foundations, permitting, transport, rigging and installation are handled through **Barrington Properties, Inc.** →
